

Village Benches

Village Council has been researching options to gradually replace the aging teak benches that are used throughout the Village. Many of the current teak benches are nearing the end of their useful life and have become increasingly difficult to maintain.

Village council has selected a 69.5in bench with cast aluminum ends, an Ipe wood seat and back, and two end arms; the seat back can accommodate a bronze plaque. The benches are manufactured by Maglin. The Brazilian Ipe ("ee-pay") wood is extremely hard and the dense wood withstands punishment from both natural elements and people.

The Village plans on eventually replacing the 62 current park benches. If you wish to donate a park bench or memorialize a loved one with a park bench placed in the Village, contact Allison at info@mariemont.org
